RUN YOUR RESTAURANT LIKE A PRO !!

Key features of Restaurant POS System

OneContact POS software comes equipped with all the features you need to streamline your operations and boost your profit margin.

Cloud Point-of-Sale (POS)

Run your restaurant on unlimited devices- web-based or Tablet. No distinct hardware is required. 'Offline Mode' keeps you operational so it's always business as usual.

Kitchen Display System (KDS)

Effectively manage your kitchen workflow. Run multiple kitchen stations, track item completion across all outlets, and gain real-time insights into kitchen performance.

Stock In & Stock Out

Keep tight control of your inventory by tracking the Stock-in and Stock-out every day. Tally the physical available stock with the Ideal Stock automatically and eliminate any discrepancy in Stock.

Live Dashboard & Reporting

Be in control of your operations anytime, anywhere! Analyze business trends and get a high-level summary snapshot of your restaurant performance with a powerful business dashboard and real-time reports.

Inventory Management

Gain total control of your restaurant's inventory with powerful inventory tools and reports. Receive & transfer stock between locations, run digital stock takes, account for wastage, and more.

Call Center Integration with AVAYA

Enhance customer satisfaction by integrating your call center to Avaya Cloud Call Center. Answered calls will automatically display the customer profile while placed orders are printed directly to your kitchen.

Loyalty Program

Run a fun, effective loyalty program and boost your revenue. No plastic cards or separate loyalty systems are required; your customers earn, track, and redeem loyalty with incredible ease.

Menu Management

Manage the menu across all your outlets from OneContact POS. All the changes are reflected instantly, thus eliminating the manual effort of the menu update.

Online Delivery Platform Integration

Manage orders from multiple channels using One Contact POS software. Integrate with online food portals like Zomato, Uber Eats, Talabat, Careem, and Noon.

Recipe Management

Feed-in your recipes into the POS to keep a track of the stock consumed based on the items ordered. Any update in the recipes is reflected instantly across outlets, thus ensuring consistency.
